Exercise Worksheet

From the Course:
Understanding Docker Run, Dockerfile, Docker-Compose for Beginners

Install Docker Toolbox for Windows Home

Download the Docker Toolbox here: https://docs.docker.com/docker-for-mac/docker-toolbox/

After installing run the "Docker Quickstart Terminal" from your Start menu. Run the "docker run hello-world" container to see if it is working.

Reminder: In the rest of the course you will need to substitute "localhost" with the IP Address of your Docker Quickstart Terminal. Don't forget that!
